**AT TELO-REVERS ACADEMY
WE FULLY BELIEVE IN OUR
PROGRAM AND OUR
STUDENTS. WE FOCUS ON
STANDARDS TO SET OUR
STUDENTS APART.**

VISION

Telo-Revers Pharmacy Inc. was founded on the ideals of helping patients be their best self. Our program holds itself to a higher standard with highly experienced professionals from various fields to better prepare our students. We offer an all-inclusive tuition that includes uniforms, books, externships, and PTCB testing.

ACTIVITIES

During our 12 week program you will gain knowledge and practical skills. Classes include: Algebraic and Pharmaceutical Mathematics, Brand-Generic Identifiers, LASA Drugs, Insurance Auditing, Standard and Unit Dose Drug Packaging, Chemical and Drug Compounding, IV and Chemotherapy Preparations, and PTCB Test Preparation.

PROFESSORS

The biggest factor that sets us apart is our faculty. Many programs offer only book study with no real interaction, or minimally inexperienced trainers without real world experience. Our faculty consists of a former DEA agent, practicing attorney, former VP of Pharmacy Operations, independent pharmacy owner, and two PTCB certified technicians.

MISSION

Telo-Revers Academy prepares students to take the nationally recognized PTCB and ExCPT examinations. Additionally, you will receive real world training from seasoned professionals who want you to succeed. This fast paced program is designed for individuals who are dedicated to becoming leaders of their field. We will prepare you for true patient needs, such as specialized prescriptions, insurance problems, drug interactions, dosing problems, and inventory control. Upon completion of this program not only will you be ready to pass the exam but you will be a leader among your peers.

WHAT TO EXPECT

Pharmacy Technician Students can expect a rigorous, fast paced program comprised of educational book study, interactive lecture, hands on experiments and real world experience. Upon completion of the program your PTCB examination will be paid by Telo-Revers and you will be ready to apply for state licensure. We offer assistance in job placement where you can expect to earn upwards of \$25 hourly in this growing field.
